S·A·C·II

Sente's simulator adds a new dimension to coin-operated gaming—the dimension of movement. SAC-II combines video gaming and amusement rides, bringing game and player together to move as one. With SAC-II, every movement of the controls is experienced by the player as the game takes him through space, white water rafting, down a roller coaster, or on any other ride/game. As with all Sente systems, SAC-II is fully interchangeable. It features the same high quality sound system found in SAC-I.

Physical Characteristics:

Upright
Boxed
